Hasselblad X5 Ultimate quality 16bit RGB film scans

The Hasselblad Flextight X5 is capable of resolutions up to 8000 dpi. Although other devices have higher optical resolution, the X5 has superior clarity and detail retention due to the mechanical precision of its build, the electronic handling of the sensor, and the amazing quality of its Rodenstock lens. The Hasselblad Flextight X5 scanner is the new benchmark of scanning excellence.

Code	Film Size	Full Res 16bit Scan Size	3F Full Res Raw/Tiff
